

# Ausco Products Introduces Wet Enclosed Brakes for the Toyota Landcruiser

*US Patents 7,735,612 and 8,235,183  
European Patents EP 2,093,450 (B1)  
and EP 1,801,449 (B1)*

**Designed specifically for the Toyota Model 70 Landcruiser used in mining, this brake improves your bottom line and your operator's safety.**

## **Simpler:**

- Drop-In Design - bolts to existing knuckle – no cutting, drilling, or welding
- Double 2-Stage Technology – uses Toyota OEM Master Cylinder
- Lightweight Anodized Housing – reduces wear and tear on CV joints
- Removable Slave Cylinder – can service/remove brake without bleeding
- Pre-Assembled – can easily be installed or removed in one piece
- Uses Common Cat T04 oil – available worldwide from any Cat dealer

## **Safer:**

- 4-Wheel Parking – safer emergency stops with no driveline damage
- Aluminum Housing – cools faster and better for less fade and long life
- Double 2-Stage Technology – great pedal feel for strong, smooth stops
- Meets Vale Ramp Test – exceeds Canadian mining standards

## **More Cost-Effective:**

- High-Energy Metallic Linings – low maintenance and less downtime
- Internal Cooling Chamber – low maintenance and less downtime
- Dual Grease Barrier Sealing – low maintenance and less downtime
- Proper Running Clearance – can operate at higher speeds in potash mines

**We know mining. We know brakes.  
We live for both.**
